

# 32 HEX PANEL IP 32 HEX PANEL IP PEARL

## *User Instructions*

©2019 ADJ Products, LLC all rights reserved. Information, specifications, diagrams, images, and instructions herein are subject to change without notice. ADJ Products, LLC logo and identifying product names and numbers herein are trademarks of ADJ Products, LLC. Copyright protection claimed includes all forms and matters of copyrightable materials and information now allowed by statutory or judicial law or hereinafter granted. Product names used in this document may be trademarks or registered trademarks of their respective companies and are hereby acknowledged. All non-ADJ Products, LLC brands and product names are trademarks or registered trademarks of their respective companies.

**ADJ Products, LLC** and all affiliated companies hereby disclaim any and all liabilities for property, equipment, building, and electrical damages, injuries to any persons, and direct or indirect economic loss associated with the use or reliance of any information contained within this document, and/or as a result of the improper, unsafe, insufficient and negligent assembly, installation, rigging, and operation of this product.

#### **FCC STATEMENT**

**This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.**

#### **FCC RADIO FREQUENCY INTERFERENCE WARNINGS & INSTRUCTIONS**

**This product has been tested and found to comply with the limits as per Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device uses and can radiate radio frequency energy and, if not installed and used in accordance with the included instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following methods:**

- Reorient or relocate the device.
- Increase the separation between the device and the receiver.
- Connect the device to an electrical outlet on a circuit different from which the radio receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### **DOCUMENT VERSION**

**Due to additional product features and/or enhancements, an updated version of this document may be available online.**

**Please check [www.adj.com](http://www.adj.com) for the latest revision/update of this manual before beginning installation and/or programming.**

<b>Date</b>	<b>Document Version</b>	<b>Software Version <math>\geq</math></b>	<b>DMX Channel Mode</b>	<b>Notes</b>

#### **Europe Energy Saving Notice**

**Energy Saving Matters (EuP 2009/125/EC)**

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!

**Unpacking:** Thank you for purchasing the 32 Hex Panel IP/32 Hex Panel IP Pearl by ADJ Products, LLC. Every unit has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton appears to be damaged, carefully inspect your fixture for any damage and be sure all accessories necessary to operate the unit has arrived intact. In the case damage has been found or parts are missing, please contact our toll free customer support number for further instructions. Do not return this unit to your dealer without first contacting customer support.

**Introduction:** The 32 Hex Panel IP/32 Hex Panel IP Pearl is a DMX intelligent, IP rated LED wash fixture. This fixture can be used in a stand alone mode or connected in a Master/Slave configuration. This fixture has five operating modes: RGBWA + UV dimmer mode, Static Color mode, Auto Run mode, Color Macro mode, and DMX control.

***This product is intended to be used by professionally trained personnel only and is not suitable for private use.***

**Customer Support:** Contact ADJ Service for any product related service and support needs. Also visit [forums.adj.com](http://forums.adj.com) with questions, comments or suggestions.

**Parts:** To purchase parts online visit <http://parts.americandj.com>

**ADJ SERVICE USA - Monday - Friday 8:00am to 4:30pm PST**

**Voice: 323-582-2650 | Fax: 323-582-2941 | support@adj.com**

**ADJ SERVICE EUROPE - Monday - Friday 08:30 to 17:00 CET**

**Voice: +31 45 546 85 60 | Fax: +31 45 546 85 96 | support@adj.eu**

**Caution!** There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, doing so will void your manufactures warranty. In the unlikely event your unit may require service please contact ADJ Products, LLC.

***PLEASE recycle the shipping carton when ever possible.***

## 32 Hex Panel IP/32 Hex Panel IP Pearl

## Features

- Multi-Colors
- Five Operating Modes
- Electronic Dimming 0-100%
- DMX-512 protocol
- IP65 Locking 5-Pin XLR Connections In/Out
- Multiple DMX Channel Modes
- Multiple Unit Power Linking (See page 32)

Included:

- 1 x IP65 Locking Power Cable
- 2 x Safety Cables
- 1 x Magnetic Removable Frost Filter

## 32 Hex Panel IP/32 Hex Panel IP Pearl

## Warranty Registration

The 32 Hex Panel IP/32 Hex Panel IP Pearl carries a 2 year limited warranty. Please fill out the enclosed warranty card to validate your purchase. All returned service items whether under warranty or not, must be freight pre-paid and accompany a return authorization (R.A.) number. The R.A. number must be clearly written on the outside of the return package. A brief description of the problem as well as the R.A. number must also be written down on a piece of paper included in the shipping carton. If the unit is under warranty, you must provide a copy of your proof of purchase invoice. You may obtain a R.A. number by contacting our customer support team on our customer support number. All packages returned to the service department not displaying a R.A. number on the outside of the package will be returned to the shipper.

## 32 Hex Panel IP/32 Hex Panel IP Pearl

## Installation

The unit should be mounted using a mounting clamp (not provided), affixing it to the mounting bracket that is provided with the unit. Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times the unit's weight. **ALWAYS** use safety cables that can hold 12 times the weight of the unit when installing the fixture. **Note: 2 safety cables are provided, one safety cable is for the unit itself, the second safety cable is for the LED array cover.** This equipment must be installed by a professional, and it must be installed in a place where it is out of the reach of people's grasp.

**Ensure ALL connections and end caps are properly sealed with a non-conductive dielectric grease (available at most electrical suppliers) to prevent water ingress/condensation and/or corrosion.**

**FOR YOUR OWN PERSONAL SAFETY, PLEASE READ AND UNDERSTAND THIS MANUAL COMPLETELY BEFORE YOU ATTEMPT TO INSTALL OR OPERATE THIS UNIT!**

- **THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT. DO NOT ATTEMPT ANY REPAIRS YOURSELF; DOING SO WILL VOID YOUR MANUFACTURES WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURES WARRANTY AND ARE NOT SUBJECT TO ANY WARRANTY CLAIMS AND/OR REPAIRS.**
- **DO NOT PLUG THE FIXTURE INTO A DIMMER PACK!  
NEVER OPEN THIS FIXTURE WHILE IN USE!  
UNPLUG POWER BEFORE SERVICING FIXTURE!  
NEVER TOUCH THE FIXTURE DURING OPERATION AS IT MAY BE HOT!  
KEEP FLAMMABLE MATERIALS AWAY FROM FIXTURE!**
- **ENSURE ALL CONNECTIONS AND END CAPS ARE PROPERLY SEALED WITH A DIELECTRIC GREASE (AVAILABLE AT MOST ELECTRICAL SUPPLIERS) TO PREVENT WATER CORROSION AND/OR ELECTRICAL SHORT CIRCUIT.**
- **IF THE FIXTURE IS EXPOSED TO ENVIRONMENTAL TEMPERATURE CHANGES SUCH AS RELOCATION FROM AN OUTDOOR COLD TO AN INDOOR WARM ENVIRONMENT, DO NOT POWER THE FIXTURE ON IMMEDIATELY. INTERNAL CONDENSATION AS A RESULT OF ENVIROMENTAL TEMPERATURE CHANGE CAN CAUSE INTERNAL FIXTURE DAMAGE. LEAVE THE FIXTURE POWERED OFF UNTIL IT HAS REACHED ROOM TEMPERATURE BEFORE POWERING ON.**
- **NEVER LOOK DIRECTLY INTO THE LIGHT SOURCE! RETINA INJURY RISK - MAY INDUCE BLINDNESS!  
SENSITIVE PERSONS MAY SUFFER AN EPILEPTIC SHOCK!**
- Be sure that the local power outlet is compatible with the required voltage for your unit.
- Do not attempt to operate this unit if the power cord has been frayed or broken.
- Do not attempt to remove or break off the ground prong from the electrical cord. This prong is used to reduce the risk of electrical shock and fire in case of an internal short.
- Disconnect from main power before making any type of connection.
- Do not remove the cover under any conditions. There are no user serviceable parts inside.
- Never operate this unit when it's cover is removed.
- Always be sure to mount this unit in an area that will allow proper ventilation. Allow about 6" (15cm) between this device and a wall.
- Do not attempt to operate this unit, if it becomes damaged.
- Always mount this unit in safe and stable matter.
- Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
- Cleaning -The fixture should be cleaned only as recommended by the manufacturer. See page 32 for cleaning details.
- Heat -This fixture should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- The fixture should be serviced by qualified service personnel when the appliance does not appear to operate normally or exhibits a marked change in performance.

**! CAUTION****HIGH  
INTENSITY  
ULTRAVIOLET  
LIGHT****AVOID DIRECT EYE & SKIN EXPOSURE.  
WEAR PROPER EYE & SKIN PROTECTION.  
SEE MANUAL FOR SAFETY INSTRUCTIONS.****RISK GROUP 3 - RISK OF EXPOSURE TO ULTRAVIOLET (UV) RADIATION!****FIXTURE EMITS HIGH INTENSITY ULTRAVIOLET (UV) LIGHT FROM THE UV LED.****WEAR PROPER EYE AND SKIN PROTECTION.****AVOID PROLONGED PERIODS OF EXPOSURE TO THE UV LED.****AVOID WEARING WHITE COLOR CLOTHING AND/OR USING (UV) PAINTS ON SKIN.****AVOID DIRECT EYE AND/OR SKIN EXPOSURE AT DISTANCES SHORTER THAN 11 feet (3.3m).****DO NOT OPERATE FIXTURE WITH DAMAGED OR MISSING EXTERNAL COVER.****DO NOT LOOK DIRECTLY INTO THE (UV) LIGHT AND/OR VIEW (UV) LIGHT DIRECTLY WITH OPTICAL INSTRUMENTS THAT MAY CONCENTRATE THE LIGHT/RADIATION OUTPUT.****INDIVIDUALS SUFFERING FROM A RANGE OF EYE CONDITIONS, SUNLIGHT EXPOSURE DISORDERS, OR INDIVIDUALS USING PHOTSENSITIVE MEDICATION, MAY RECEIVE DISCOMFORT IF EXPOSED TO THE ULTRAVIOLET (UV) LIGHT EMITTED FROM THIS FIXTURE.**

**IP65 RATED**

An IP rated lighting fixture is one, which is commonly installed in outdoor environments and has been designed with an enclosure that effectively protects the ingress (entry) of external foreign objects such as dust and water. The International Protection (IP) rating system is commonly expressed as "IP" (Ingress Protection) followed by two numbers (i.e. IP65) where the numbers define the degree of protection. The first digit (Foreign Bodies Protection) indicates the extent of protection against particles entering the fixture and the second digit (Water Protection) indicates the extent of protection against water entering the fixture. An IP65 rated lighting fixture is one, which has been designed and tested to protect against the ingress of dust (6) and high-pressure water jets from any direction (5).

**MARINE/COASTAL ENVIRONMENT INSTALLATIONS**

NOT suitable for marine and/or coastal environment installations. Installing this fixture in a marine and/or coastal environment may cause corrosion and/or excessive wear to the interior and/or exterior components of the fixture. Damages and/or performance issues resulting from installation in a marine and/or coastal environment will void the manufactures warranty and will NOT be subJect to any warranty claims and/or repairs.

- ① OPTIONAL CLAMP (Not Included)
- ② ADJUSTABLE MOUNTING BRACKET
- ③ OPTIONAL OMEGA BRACKET (Not Included)

The 32 Hex Panel IP is fully operational in three different mounting positions; hanging upside-down, mounted sideways on trussing, or set on a flat level surface. Be sure this fixture is kept at least 12m (40ft) away from any flammable materials (decoration etc.). **ALWAYS** use and install the supplied safety cable as a safety measure to prevent accidental damage and/or injury in the event the clamp fails.

Screw one clamp via a M12 screw and nut into the Omega holder. Insert the quick-lock fasteners of the Omega holder into the respective holes of the adjustable mounting bracket. Tighten the quick-lock fasteners fully clockwise. Pull the safety-cable through the openings located on the rear of the unit and over the trussing system or a safe fixation spot. Insert the end in the carabine and tighten the safety screw.

Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times the unit's weight. **ALWAYS** use safety cables that can hold 12 times the weight of the unit when installing the fixture.

This equipment must be installed by a professional, and it must be installed in a place where it is out of the reach of people's grasp.

**Ensure ALL connections and end caps are properly sealed with a non-conductive dielectric grease (available at most electrical suppliers) to prevent water ingress/condensation and/or corrosion.**

ENSURE ALL CONNECTIONS AND END CAPS ARE PROPERLY SEALED WITH A DIELECTRIC GREASE (AVAILABLE AT MOST ELECTRICAL SUPPLIERS) TO PREVENT WATER CORROSION AND/OR ELECTRICAL SHORT CIRCUIT.

TO MAINTAIN IP65 RATING INTEGRITY AND PREVENT WATER FROM ENTERING THE FIXTURE, ALL UNUSED CONNECTION RUBBER CAPS MUST BE SEALED.

**DMX-512:** DMX is short for Digital Multiplex. This is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a DATA “OUT” terminal).

**DMX Linking:** DMX is a language allowing all makes and models of different manufactures to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, when using several DMX fixtures try to use the shortest cable path possible. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example; a fixture assigned a DMX address of 1 may be placed anywhere in a DMX line, at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

**Data Cable (DMX Cable) Requirements (For DMX Operation):** The 32 Hex Panel IP/32 Hex Panel IP Pearl can be controlled via DMX-512 protocol. The DMX address is set on the back panel of the 32 Hex Panel IP/32 Hex Panel IP Pearl. Your unit and your DMX controller require a standard 5-pin XLR connector for data input and data output. We recommend Accu-Cable DMX cables. If you are making your own cables, be sure to use standard 110-120 Ohm shielded cable (This cable may be purchased at almost all pro lighting stores). Your cables should be made with a male and female XLR connector on either end of the cable. Also remember that DMX cable must be daisy chained and cannot be split.

**Special Note: Line Termination.** When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behavior. A terminator is a 110-120 ohm 1/4 watt resistor which is connected between pins 2 and 3 of a male XLR connector (DATA + and DATA -). This unit is inserted in the female XLR connector of the last unit in your daisy chain to terminate the line. Using a cable terminator (ADJ part number Z-DMX/T) will decrease the possibilities of erratic behavior.

**TO MAINTAIN IP65 RATING INTEGRITY AND PREVENT WATER FROM ENTERING THE FIXTURE, ALL UNUSED CONNECTION RUBBER CAPS MUST BE SEALED AND ONLY IP65 RATED POWER AND DATE CABLES MUST BE USED.**

All fixtures should be given a DMX starting address when using a DMX controller, so the correct fixture responds to the correct control signal. This digital starting address is the channel number from which the fixture starts to “listen” to the digital control signal sent out from the DMX controller. The assignment of this starting DMX address is achieved by setting the correct DMX address on the digital control display on the fixture.

You can set the same starting address for all fixtures or a group of fixtures, or set different addresses for each individual fixture. Setting all fixtures to the same DMX address will cause all fixtures to react in the same way, in other words, changing the settings of one channel will affect all the fixtures simultaneously.

If you set each fixture to a different DMX address, each unit will start to “listen” to the channel number you have set, based on the quantity of DMX channels of each fixture. That means changing the settings of one channel will only affect the selected fixture.

In the case of the 32 Hex Panel IP/32 Hex Panel IP Pearl, when in 6 channel mode you should set the starting DMX address of the first unit to 1, the second unit to 7 (6 + 1), the third unit to 13 (7 + 6), and so on. (See chart below for more details.)

Channel Mode	Unit 1 Address	Unit 2 Address	Unit 3 Address	Unit 4 Address
6 channels	1	7	13	19
10 channels	1	11	21	31
11 channels	1	12	22	32
16 channels	1	17	33	49
48 channels	1	49	97	145
57 channels	1	58	115	172

## SYSTEM MENU

The fixture includes an easy to navigate system menu control panel display where all necessary settings and adjustments are made. (See image below) During normal operation, pressing the **MENU** button once will access the fixture's main menu. Once in the main menu, you can navigate through the different functions and access the sub-menus with the **UP** and **DOWN** buttons. When you reach a field that requires adjusting, press the **ENTER** button to access that field and use the **UP** and **DOWN** buttons to adjust the field. Pressing the **ENTER** button once more will confirm your setting. You may exit the main menu at any time without making any adjustments by pressing the **MENU** button.

## LCD CONTROL PANEL LOCKOUT

When the **Key Lock** function is activated, the control panel will automatically lock after the time set under the **LCD. Set** submenu "**Backlight**".

When the **Key Lock** function is set to **ON**, the control panel will lock and the display will show "**LOCKED\*\*\*\*\***". Press and hold the **MODE** button for 3 seconds to unlock.

When the **Key Lock** function is set to **ON1**, the control panel will lock and the display will show "**LOCKED\*\*\*\*\***". To unlock the display follow these steps:

1. When locked, the display will show: **LOCKED\*\*\*\*\***.
2. Press the **UP** button, and the display will change to: **LOCKED\*\*\*\*** (one \* disappears).
3. Press the **DOWN** button, and the display will change to: **LOCKED\*\*\*** (two \* disappears).
4. Press the **UP** button, and the display will change to: **LOCKED\*\*** (three \* disappears).
5. Press the **DOWN** button, and the display will change to: **LOCKED\*** (four \* disappears).
6. Press the **ENTER** button, and the display will be unlocked.

If the button sequence was entered correctly, the display and control panel will unlock. If the button sequence was entered incorrectly, the display will return to the DMX address display.

**DMX Addressing:**

Operating through a DMX controller gives the user the freedom to create their own programs tailored to their own individual needs.

1. To run your fixture in DMX mode press the MODE button and press the UP or DOWN buttons until “**Set Addr**” is displayed and press ENTER. The current DMX address will now be displayed.
2. Use the UP or DOWN buttons to find your desired DMX address, and press ENTER.

**DMX Channel Modes** - With this function, you can select your desired DMX channel mode. The 32 Hex Panel IP/32 Hex Panel IP Pearl has 7 DMX channel modes: 6/10/11/16/48/57/96.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**User Mode**” is displayed and press ENTER. The current DMX channel mode will now be displayed.
2. Press the UP or DOWN buttons to scroll through the 7 DMX channel modes. When you have found your desired DMX channel mode, press ENTER to confirm your selection or press the MODE button to exit. Please see pages 13-17 for the DMX modes, values, and traits.

**Dimmer Curve Setting:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed, and press ENTER. Press the UP or DOWN buttons until “**DimCurve**” is displayed, and press ENTER.
2. Use the UP or DOWN buttons to scroll through the dimmer curves. Press ENTER to confirm your selection or press the MODE button to exit.
3. There are 5 dimmer curve settings to choose from. Please see the Dimmer Curve Diagram Chart on page 28 to see the settings and their respective beginning and ending fade times.

**DMX Lost Setting:**

This mode is used as a precaution mode, that in case the DMX signal is lost, the operating mode chosen in the setup is the running mode the fixture will go into when the DMX signal is lost. You can also set this as the operating mode you would like the unit to return to when power is applied.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed, and press ENTER. Press the UP or DOWN buttons until “**NODMX**” is displayed and press ENTER.
2. Use the UP and DOWN buttons to scroll through the 3 DMX standing states.
  - “**Hold**” - If the DMX signal is lost or interrupted, the fixture will stay in the last DMX set up. If power is applied and this mode is set, the unit will automatically go into the last DMX set up.
  - “**Blackout**” - If the DMX signal is lost or interrupted, the unit will automatically go into stand by mode.
  - “**Program**” - If the DMX signal is lost or interrupted, the unit will automatically go into Auto Run mode.
3. Use the UP and DOWN buttons to find your desired DMX state and press ENTER to confirm your selection or press the MODE button to exit.

**Auto Run Mode:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons so that “**Menu Function**” is displayed, and press ENTER. Press the UP or DOWN buttons until “**AUTO RUN FQN**” is displayed and press ENTER.
2. Use the UP or DOWN buttons to scroll through the 99 Auto Run programs. Press ENTER to confirm your selection or press the MODE button to exit.

**Static Color Mode, Color Change Mode, and Color Fade Mode:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons so that “**Menu Function**” is displayed and press ENTER. Press the UP or DOWN buttons until **ONE** of the following running modes is displayed:
  - “**1. STATC**” - Static Color Mode (Color adjustment and strobing)
  - “**2. CHANG**” - 15 Color Change Mode (Color changing, change speed adjustment, & strobing)
  - “**3. CHANG**” - 30 Color Change Mode (Color changing, change speed adjustment, & strobing)
  - “**4. FADE**” - Color Fade Mode (Color fading, fade speed adjustment, & strobing)

**Note: See the System Menu on page 21.**

2. Press the ENTER button to select your desired running mode. Use the UP and DOWN buttons to make your desired adjustments. Press the ENTER button each time you are finished making adjustments in the current running mode.

**Color Macro Mode:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed, and press ENTER.
2. Press the UP or DOWN buttons until “**Macros**” is displayed and press ENTER.
3. There are 63 colors to choose from. Use the UP and DOWN buttons for find your desired color.
4. Once you have found your desired color press the ENTER button. Press the MODE button to exit.

**LCD Display Settings:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed, and press ENTER.
2. Press the UP or DOWN buttons until “**LCD.Set**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through the options, and press ENTER to make your selection.
  - **Backlight** - This lets you set how long the backlight display will stay on.
  - **Key Lock** - This lets you control the key lock feature.
    - “**OFF**” - The keypad is unlocked, simply press the MODE button to activate the keypad.
    - “**ON**” - This is a simple keypad lock. “**LOCKED \*\*\*\*\***” will be displayed. Press the MODE button for at least 5 seconds to unlock the keypad.
    - “**ON1**” - This setting is used to prevent the accidental unlocking of the keypad. To unlock the keypad you will have to enter a passcode. “**LOCKED \*\*\*\*\***” will be displayed. To unlock the keypad press UP, DOWN, UP, DOWN, & ENTER in that order. Every press of these buttons will delete an asterisk.
  - **DisFlash** - In this function you can activate the display flash.

**Default Running Mode:**

In this mode you can reset all function settings to their default modes.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**DFSET**” displayed, and press ENTER.
3. Use the UP or DOWN button to toggle between “**ON**” and “**OFF**”. To reset to the default settings, select “**ON**” and press ENTER.

**Unit Temperature** - With this function you can switch the temperature setting between celsius or fahrenheit.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Temp**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to switch between “**Fahren**” and “**Celsius**”.
4. Once you have found your desired setting press ENTER to confirm, or press MODE to exit.

**White Balance Settings** - With this function you can adjust RGBWA & UV colors to balance the white color.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Settings WhiteBal**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to switch between the colors. When you have found the color you wish to adjust press ENTER. Use the UP or DOWN button to adjust the color values.
4. Once you have made your desired adjustment press ENTER.

**Fan Setting** - With this function you can adjust the fan speeds.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Fan Mode**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through different frequencies.
4. Once you have found your desired frequency press ENTER.

**Frequency Setting** - With this function you can adjust the dimming frequency.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Fre\_hz**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through different frequencies.
4. Once you have found your desired frequency press ENTER.

**Gamma Brightness Setting** - With this function you can adjust the gamma brightness.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Function**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Gamma**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through different settings.
4. Once you have found your desired setting press ENTER.

**Time Information:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Info**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**TimeInfo**” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through the time information menu.
  - “**TimeInfo Current**” - This will display the current running time of the fixture in hours.
  - “**TimeInfo TotalTim**” - This will display the total running time of the fixture in hours.
  - “**TimeInfo LastClea**” - This will display the last time the running time was cleared.
  - “**TimeInfo TimerPIN**” - This menu function will allow you to clear the current running time and total running time.

**Temperature Information:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Info**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**TempInfo**” is displayed and press ENTER.
3. The current temperature will now be displayed. Press the MENU button to exit.

**Model Information:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Info**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Model Inf**” is displayed and press ENTER.
3. The model name will now be displayed. Press the MENU button to exit.

**Software Information:**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Menu Info**” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “**Software**” is displayed and press ENTER.
3. The current software version will now be displayed. Press the MENU button to exit.

**Slave Setting** - With this function you can set the unit as a “Slave” in Master-Slave configuration.

1. Plug the fixture in and press the MODE button and press the UP or DOWN buttons until “**Slave**” is displayed, and press ENTER.
2. The unit is now set as a “Slave” in a Master-Slave configuration.

**Strobe Mode** - With this function you switch between all LED strobing or Zone strobing.**Note: Strobe Mode works with DMX only. The strobe mode setting will only work with “Random Strobing” in the “Strobe” channel.**

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “**Strobe Mode**” is displayed, and press ENTER.
2. Use the UP or DOWN buttons to switch between Random 1 and Random 2.
3. Random 1 has all LEDs strobing together, and Random 2 will zone strobe.
4. Select your desired strobe mode and press the ENTER button. Press the MODE button to exit.

**Manual Control** - With this function you can manually adjust the dimmer, colors, and strobing.

1. Plug the fixture in and press the MODE button and press the UP or DOWN buttons until “**Manual**” is displayed, and press ENTER.
2. Press the UP or DOWN buttons to scroll through dimmer, colors, and strobe.

**Note: See the system menu on page 22.**

3. Press ENTER to select the function you would like to adjust and use the UP and DOWN buttons to make the adjustments.
4. Once you have made your desired adjustments, press the ENTER button.

**Master-Slave Configuration:**

This function will allow you to link units together to run in a Master-Slave set-up. In a Master-Slave set up one unit will act as the controlling unit and the others will react to the controlling units built-in programs. Any unit can act as a Master or as a Slave however, only one unit can be programmed to act as the “Master.”

**Master-Slave Connections and Settings:**

1. Daisy chain your units via the XLR connector on the rear of the unit. Use standard XLR data cables to link your units together. Remember that the Male XLR connector is the input and the Female XLR connector is the output. The first unit in the chain (master) will use the female XLR connector only. The last unit in the chain will use the male XLR connector only.
2. Connect the first “Slave” unit to the “Master.”
3. Set the “Master” unit to your desired mode of operation. On the “Slave” unit(s) press the MODE button and press the UP or DOWN buttons until “Slave” is displayed and press ENTER.
4. The slave unit(s) will now follow the master unit.

## Barn Doors Not Included

1. Install and secure the included magnetic LED array cover. (**Note: Not required when using Barn Doors**)

2. Place the Barn Door attachment over the front of the unit. Line up the 4 Barn Door thumb screws with the thumb screw holes located on each side of unit (2 on each side). Screw thumb screws in and tighten. **DO NOT** overtighten.

# 32 Hex Panel IP/32 Hex Panel IP Pearl Barn Door Dimensional Drawings

Barn Doors Not Included

With this feature you can connect the fixtures to one another using the power cable input and output sockets.

**NOTE: USE CAUTION WHEN POWER LINKING OTHER FIXTURES AS THE POWER CONSUMPTION OF OTHER MODEL FIXTURES MAY EXCEED THE MAX POWER OUTPUT ON THIS FIXTURE! CHECK SILK SCREEN FOR MAX AMPS.**

Listed below are a few common problems the user may encounter, with solutions.

***Unit not responding to DMX:***

1. Check that the DMX cables are connected properly and are wired correctly (pin 3 is “hot”; on some other DMX devices pin 2 may be ‘hot’). Also, check that all cables are connected to the right connectors; it does matter which way the inputs and outputs are connected.

Due to fog residue, smoke, and dust cleaning the internal and external optical lenses must be carried out periodically to optimize light output.

1. Use normal glass cleaner and a soft cloth to wipe down the outside casing.
2. Clean the external optics with glass cleaner and a soft cloth every 20 days.
3. Always be sure to dry all parts completely before plugging the unit back in.

Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew).

**MANUFACTURER'S LIMITED WARRANTY**

- A. ADJ Products, LLC hereby warrants, to the original purchaser, ADJ Products, LLC products to be free of manufacturing defects in material and workmanship for a prescribed period from the date of purchase (see specific warranty period on reverse). This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
- B. For warranty service you must obtain a Return Authorization number (RA#) before sending back the product—please contact ADJ Products, LLC Service Department at 800-322-6337. Send the product only to the ADJ Products, LLC factory. All shipping charges must be pre-paid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, ADJ Products, LLC will pay return shipping charges only to a designated point within the United States. If the entire instrument is sent, it must be shipped in its original package. No accessories should be shipped with the product. If any accessories are shipped with the product, ADJ Products, LLC shall have no liability whatsoever for loss of or damage to any such accessories, nor for the safe return thereof.
- C. This warranty is void if the serial number has been altered or removed; if the product is modified in any manner which ADJ Products, LLC concludes, after inspection, affects the reliability of the product; if the product has been repaired or serviced by anyone other than the ADJ Products, LLC factory unless prior written authorization was issued to purchaser by ADJ Products, LLC; if the product is damaged because not properly maintained as set forth in the instruction manual.
- D. This is not a service contract, and this warranty does not include maintenance, cleaning or periodic check up. During the period specified above, ADJ Products, LLC will replace defective parts at its expense with new or refurbished parts, and will absorb all expenses for warranty service and repair labor by reason of defects in material or workmanship. The sole responsibility of ADJ Products, LLC under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of ADJ Products, LLC. All products covered by this warranty were manufactured after August 15, 2012, and bear indentifying marks to that effect.
- E. ADJ Products, LLC reserves the right to make changes in design and/or improvements upon its products without any obligation to include these changes in any products theretofore manufactured.

No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with products described above. Except to the extent prohibited by applicable law, all implied warranties made by ADJ Products, LLC in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. And no warranties, whether expressed or implied, including warranties of merchantability or fitness, shall apply to this product after said period has expired. The consumer's and/or Dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall ADJ Products, LLC be liable for any loss or damage, direct or consequential, arising out of the use of, or inability to use, this product.

This warranty is the only written warranty applicable to ADJ Products, LLC Products and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.
